Monitoring Requirements Not Met for Dallastown-Yoe Water Authority

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 1st Quarter we did not sample for HAA5s and TTHMs within proper time frame and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for HAA5s and TTHMs and how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Haloacetic Acids (HAA5)	Quarterly	4	02/05-02/11/18	02/13/18
Trihalomethanes (TTHM)	Quarterly	4	02/05-02/11/18	02/13/18

What happened? What was done?

Samples were taken at wrong time/ Issue was explained to the employees; We have improved our policy since.
