December 15, 2014

Dear Dallastown-Yoe Water Authority Customers:

Red Lion Municipal Authority is completing construction of a new water treatment plant (WTP) to serve our customers.

Red Lion's goals were to:

- Protect the quality and safety of our drinking water supply
- Find a highly capable design engineering firm
- Proceed with the best and most affordable plan
- Make sure that the new plant would be compliant with current and upcoming regulations set by federal Environmental Protection Agency (EPA) and Pennsylvania Department of Environmental Protection (DEP)

Work began in the fall. Unfortunately, unforeseen delays (a valve malfunction in July 2014 and testing of motors and pumps in November 2014) were encountered that caused discolored water to some residents. The discoloration in the water came from natural deposits within the water main, including the mineral, manganese.

The new Red Lion Municipal Water Authority Filter Plant is scheduled for completion in January 2015. We would like to apologize for all inconveniences that this has caused, and thank you for understanding during this trying process.

Sincerely,

DALLASTOWN-YOE WATER AUTHORITY
